

Bristorm HVM Fence

Permanent Perimeter Security- Bristorm Fence

We are able to supply a range of high quality and high performance perimeter security solutions that will mitigate hostile vehicles upon impact.

The Bristorm range of HVM fences are tested and rated in the UK to BSI PAS 68 and ASTM F2656; they will protect perimeters and critical national infrastructure from vehicles weighing up to 7500kg whilst traveling at speeds up to 50mph.

For a cost-effective approach, different fence types can be connected together meaning the perceived threat can be mitigated, at every point, to keep pedestrians and asset safe.
