

DESIGNED TO SECURE AND PROTECT

stronguard™
secureguard-358

Stronguard™ Secureguard-358. High performance, ultimate protection.

This high performance system provides the ultimate protection against anti-climb and cut-through. Suitable for use in schools, prisons, data centres, utility sites, power plants, airports and secure units.

Designed for demanding applications. The system can have multiple additional features to aid additional security including detection, electrified fencing and razor wire. All detection systems are fully compatible with Stronguard™ Secureguard-358.

The Stronguard Secureguard-358 system is suitable for high security applications.

Perfectly suited for high security applications, the system provides excellent see-through visibility and is extensively used with CCTV.
