Pedestrianisation Creating safe areas for people flow close to traffic Creating safe areas for people flow is where our M.A.S.S products such as Pedestrian Guard area are ideal SAFE SPACES Creating safe working areas where close to traffic With 24/7 port operations and working site teams it is imperative that operatives have safe areas segregated from traffic and we have range of solutions available including high visibility fencing and barriers to keep your team safe TRAFFIC SAFETY Ensuring site speed limits are adhered to with signage and traffic management With the careful placement of barriers and any speed restriction signage, routes can easily be created to calm the speed of traffic TRAFFIC FLOW Creating effective movement of traffic around ports

05. Access

Securing ports areas and preventing unauthorised vehicle access

We supply and install a range of gates to secure areas from unwanted vehicles, especially where safety or security may be an issue

06. Temporary traffic schemes

Flexible movement of traffic where changes are needed within ports

With busy port operations, the ability to quickly and effectively reroute and manage traffic is key, our range of products a designed with temporary road schemes in mind

07. Car Parks

Ability to direct and manage access for visitors users of the ports and car parking

With high visitor numbers, managing and maintaining car parking spaces in ports can be achieved with support from our barriers and gates

08. Control

Control freight traffic for port authorities and checks

With Brexit and the emphasis on additional port checks, freight traffic can be directed and managed with port authorities

09. Signage

Use of traffic management signage to direct traffic

With Brexit and the emphasis on additional port checks, freight traffic can be directed and managed with port authorities

10. Delineation

Options to define specific areas and facilities within a port – new car parks, truck loading, inspections etc

We have barriers that provide either permanent or temporary delineation where port areas may have specific roles and need an element of separation especially where HGV traffic needs to be segregated from port Plant & Machinery

10 CONSIDERATIONS FOR PORT TRAFFIC MANAGEMENT

FOR THE LOVE OF LIVES

challenge

Key to effective operations is ensuring freight is

moved in and around ports with minimal disruption, our range of barriers provide a solution to this
